## programming

JavaScript  
(ES5, node.js)  
Python, C/C++,php,  
css,html,matlab,mySQL,mongoDB

## Frameworks

angularJs,ReactJs,jQuery  
nodeJs - strongLoop,Bootstrap  
materialize,Flask,meteor,gulp

## Projects

- |             |   |                          |
|-------------|---|--------------------------|
| in progress | <b>Dashboard</b>  | shipsy.in                |
|             | built logistic dashboard for DTDC   |                          |
| completed   | <b>laviet.in</b>  | blaze Infomatiks pvt ltd |
|             | built the backend and front end of a health and fitness portal  |                          |
| completed   | <b>Office Locator</b>   | demo                     |
|             | A simple React app which uses google map api to show the path from your home to office and displays personal info |                          |
| in progress | <b>soundNav</b>   | code                     |
|             | a web app built during hackathon at IIITA which enables motor disabled to navigate the web through their voice    |                          |
| in progress | <b>Recommendation-system</b>  | code                     |
|             | A simple recommendation system built in python which uses colaborative filtering                                  |                          |

## education

- |            |                                      |                                      |
|------------|--------------------------------------|--------------------------------------|
| since 2013 | <b>B.E</b> majoring Computer Science | BPIT, IPU                            |
| 2013       | <b>class XII</b>                     | little flowers public sen sec school |
| 2011       | <b>class X</b>                       | lovely rose public secondary school  |
|            | 10.0 cgpa                            |                                      |

## experience

- |               |  |                             |
|---------------|--|-----------------------------|
| March-June'16 | <b>shipsy.in ,India</b>  | Frontend engineering Intern |
|               | <i>Developed the front-end of their logistic dashboard which is to be delivered to DTDC</i>                                  |                             |
| june-aug'15   | <b>blaze infomatiks pvt ltd</b>  | web engineering intern      |
|               | <i>built their health &amp; fitness portal from scratch.Also developed an admin page so that they can easily handle data</i> |                             |
| june-aug'15   | <b>faaya.in</b>  | intern                      |
|               | <i>a work from home internship where I manged the technicality of their blog(blogger)</i>                                    |                             |

## Interest

### Technical

Machine learning(sentimental analysis,NLP),deep learning, Data Science, Physics,Image processing,data visualisation

### Other

Cricket,swimming,comics,running,high intensity workout,travelling

## Achievements

Ist year	<b>Cricket</b> <i>won the tournament</i>	college tournament
Ist yr,IInd yr	<b>Cricket</b> <i>made it to top 8 and semi-finals respectively</i>	University tournament
IIIrd year	<b>Cricket</b> <i>won the tournament</i>	College tournament
class X	<b>Badminton,Table Tennis</b> <i>won both the tournaments :)</i>	zonal level
